Except for this limited warranty, NO EXPRESS OR IMPLIED WARRANTIES ARE GIVEN AND NO AFFIRMATION OF SELLER, BY WORDS OR ACTION, WILL CONSTITUTE A WARRANTY. THE GOODS BEING PURCHASED ARE BEING SOLD ON A “WITH ALL FAULTS” BASIS. THE ENTIRE RISK AS TO THE QUALITY AND PERFORMANCE OF THE GOODS IS WITH THE BUYER. SHOULD THE GOODS PROVE DEFECTIVE FOLLOWING THEIR PURCHASE, THE BUYER, AND NOT THE MANUFACTURER, DISTRIBUTOR OR RETAILER, ASSUMES THE ENTIRE COST OF ALL NECESSARY INSTALLATION, SERVICING OR REPAIRS.

---

**Bed and Chair Sensor Pads**

**BED PLACEMENT**
- Place the pad under shoulders to be alerted when the resident sits up in bed.
- Place pad under lower back/buttocks to be alerted when the resident vacates the bed.
- Place the monitor out of reach of resident. Suitable mounting locations include: back of headboard, wall or under bed. Make sure the resident cannot tamper with monitor. (It is the caregiver's responsibility to route the cord under the sheet so the resident cannot tamper with it).

**WHEELCHAIR/CHAIR PLACEMENT**
- Center pad on the chair seat under buttocks.
- Place the monitor out of reach of the resident. Suitable mounting location is the back of wheelchair, so that the resident cannot tamper with monitor.

**Important:** **Test the System**
- Plug the pad into the monitor and apply pressure to the pad to activate the system. The Monitor will beep twice when activated.
- The alert tone will sound when pressure is released from pad. Press the “Reset” button on front of monitor to silence the alert. The status light on the front of monitor will blink when pad is plugged into monitor and pressure is on pad.

**Nurse Call Button**

**NURSE CALL BUTTON PLACEMENT**
- Place the optional nurse call button (Part # TL-2016NC) within easy reach of the resident.
- Use the clip provided to secure the button to the bedspread or chair upholstery.

**Floor Mats**

**FLOOR MAT PLACEMENT**
- Place the floor mat in the desired location such as a critical doorway or next to a bed.
- Place the monitor out of reach of resident. Suitable mounting locations include the back of the headboard, wall or under bed so the resident cannot tamper with the monitor.

**Test the System**
- Step on Floor Mat to set off the alert. The monitor is now active. The alarm will sound whenever weight is on the floor mat.
- When the alert is activated, press the “Reset” button on the front of the monitor to silence the alarm.

**Note:** The Status Light does not function when using floor mats.

**Seat Belts**

**SEAT BELT PLACEMENT**
- Unscrew one screw on either side of wheelchair that holds seat in place.
- Attach seat belt to wheelchair by lining up the grommet holes on seat belt with the screw holes. Re-insert screws through both seat belt and wheelchair to hold seat belt in place. Make sure the screws are tightened.
- Adjust seat belt to desired length using the black buckle that holds the adjustment strap in place.
- Place the monitor out of reach of the resident. Suitable mounting location is the back of wheelchair, so that the resident cannot tamper with monitor.

**Test the System**
- Buckle and unbuckle the seat belt to set off the alert. The monitor is now active. The alert will sound whenever the seat belt is unbuckled.
- When the alarm is activated, press the “Reset” button on front of the monitor to silence the alert. The status light on front of monitor will blink when the seat belt is plugged into the monitor and buckled.

**Need Set-up Help? (800) 650-3637**
**Quick Start Instructions**

1. **Install a 9-Volt Battery**
   - Insert a new, 9 Volt battery as shown.
   - The black ribbon should be under the battery for easy removal.

2. **Set Internal Adjustments to the Desired Levels**
   - Set the alarm volume with the volume dial. **IMPORTANT:** If the volume dial is turned all the way down, the monitor will be silent but will transmit the alarm signal to a receiving unit.
   - To use the transmitter with different types of receiving units, follow the detailed Programming Instructions in the right-hand column of this page.

3. **Connect a Sensor Device (Sensor Pad, Floor Mat, Nurse Call Button)**
   - **Sensor Pads, Floor Mats**
     - Lace cord through the T-shaped strain relief to guard against accidentally unplugging the device.
     - Make sure the cord is placed so it is well out of residents’ reach and is not a tripping hazard.

4. **Test the System**
   - **Bed and Chair Sensor Pads**
     - Apply pressure.
     - After two beeps, release pressure. Press the Reset button to silence the alert tone and reset the monitor.

**Mounting the TL-2016R3 Monitor**

Mount the TL-2016R3 transmitter out of resident’s reach if you are using an external device. (A) When using the Nurse Call feature, mount the transmitter within the resident’s reach. (B) Mounting hardware is included for bed or wall mounting.

**Note:** Other mounting options are available. Call 800-650-3637 for more information.

**TL-2016R3 Programming Instructions**

1. Remove the 9V battery for a few seconds and then reinsert it into TL-2016R3 and quickly (within 4 seconds of replacing the battery) press and hold the Reset Button and the Call Button on the front of the monitor until it beeps twice and the blue light on the call button is solid. If you hear a melodic tone, start the process over — it did not go into programming mode.

2. This step is for the room number, this is a 2 digit #. If you want the monitor to be designated as room #1 you will program as 01 (include a leading zero). If you only have one unit and do not have multiple rooms program this as 01.
   - Turn the dial in the upper right hand corner of the battery compartment to the first digit of the room number. Press the call button on the front of the monitor once, it will beep once.
   - Turn the dial to the second digit of the room number. Press the call button one time, it will beep once.

3. This step is for the bed number, this is a 2 digit #. If you do not need a bed # programmed, program as 00.
   - Turn the dial in the upper right hand corner of the first digit of the bed number. Press the call button one time, it will beep twice.
   - Turn the dial to the second digit of the bed number. Press the call button one time. The monitor should beep twice.

4. This step is for programming the area, this will always be a single digit number. If there are no defined areas you will always program this to number 1. If you have several wings with duplicate room numbers you can number the wings as areas.
   - Turn the dial to the area number and press the call button once. The monitor should beep 3 times.

5. This step is for programming the pager. This is a single digit number and will always be programmed to R2.
   - Turn the dial to 2 and press the call button once. The monitor should beep approximately 5 times.
   - After you have done this the blue light on the front should go out. This indicates that programming has been completed successfully.
